Glossary

ARR Annual Recurring Revenue

The recurring revenue of active subscriptions, which is paid to the vendor after deducting continuity discount and marketplace fees.

ARR for the current, incomplete month is estimated based on the days left.

This may be inaccurate. Prorated purchases are currently not tracked reliably, because JetBrains data isn't providing this.

Churn Percentage of lost users

Percentage of users, who did not renew an active subscription in the current month.

This is calculated with a grace time of 7 days. In the first year on the marketplace, this only considers monthly subscriptions. In the second year and later, both annual and monthly subscriptions are considered.

This may be inaccurate. Customers with multiple subscriptions are currently not tracked accurately. JetBrains' data contains purchases of customers. There's no reliable way to identify individual subscriptions.

Exchange Rates

JetBrains' invoices are in USD. Sales in other currencies are converted to USD. The exchange rate used here is provided by JetBrains. It may be different to the exchange rate used for the invoiced and paid amounts.
